

***DefendeRx+ You bring the Hardware and HEROware supplies the Compliant Software***

*"HEROware provides our practice customers a level of protection that we consider Business Continuum - in just a matter of minutes after server failure your onsite solution will be activated so the EMR data for the patients can be available to the physician and staff in a fraction of time a "normal" backup would take."*

Jerry Bean, Founder & President Computer Doctors of North Georgia, LLC

### Critical Issues

The HIPAA Security Rule applies to protected patient health information in electronic formats. This is protected patient information either transmitted by electronic media or maintained on electronic media and must:

- Ensure the confidentiality, integrity, and availability of all electronic protected health information the covered entity creates, receives, maintains, or transmits.
- Protect against any reasonably anticipated threats or hazards to the security or integrity of such information.

### Business Challenges

The primary goal of any healthcare provider is providing healthcare on demand to a wide array of patients. An equally important goal is the ability to financially sustain the practice and its employees. Finally, there is the goal of protecting patient's records which is now government mandated by HIPAA regulations.

The DefendeRx+ solution succinctly protects these goals with reasonable budgetary constraints in today's real time, government regulated environment.

### Prescription

The DefendeRx+ solution ensures that all Electronic Protected Health Information (E PHI) is fully protected when it is backed up and stored.

DefendeRx+ is a high availability solution with local (on-premise) and HERO Secure-Cloud (off-site) storage, protection and 7 year retention. In the event of server failure, the DefendeRx+ (exact copy of Server) takes over the role of the disabled server within a few minutes allowing for no business disruption.

DefendeRx+ meets these stringent HIPAA/HITECH rules and regulations:

- Security Plan
- Data Storage Plan
- Contingency Plan
- Disaster Recovery Plan

### Solution

The DefendeRx+ allows you to use your existing 64 bit Server as the HERO-Defender, allowing you to save money, use existing equipment and get all the advantages that the HEROware Backup and Disaster Recovery solution has to offer.
